

# TRAMMS

Traffic Measurements and Models in Multi-Service Networks

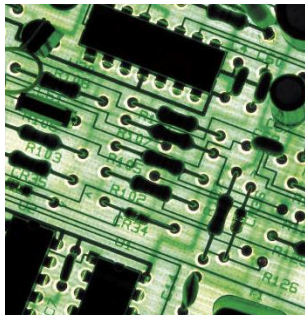

Seminar invitation:

Kista Entré Konferens, Knarrarnäsgatan 7, Kista

Friday 23rd of April 09.00 – 11.30

(coffee and sandwiches served at 10.00)

Register here: [www.acreo.se/TRAMMS-seminar](http://www.acreo.se/TRAMMS-seminar)

## TRAMMS seminar invitation:

### *Traffic monitoring and modeling*

Welcome to a seminar where results from the Celtic TRAMMS project will be presented. By joining this seminar, you will hear speakers from industry and academia present results from the project, including:

- Traffic measurements in live networks, in Sweden and Spain (Acreo)
- Traffic modeling from an academic perspective (Lunds tekniska högskola)
- Traffic modeling from an industry perspective (Ericsson)
- Traffic management and control (Procera Networks)
- DEMO: BART, Bandwidth Available in Real Time

The Celtic TRAMMS project has been running for three years, and has just finished. Among the achievements are:

- Impact on 7 product lines in 5 companies (Spain and Sweden)
- The products enable monitoring of Traffic, QoS, bandwidth and BGP
- Analyzed 3000 TB of data from live networks in 2007–2009

More information on TRAMMS can be found here: <http://projects.celtic-initiative.org/tramms>

Please register your participation at [www.acreo.se/TRAMMS-seminar](http://www.acreo.se/TRAMMS-seminar) latest 16 April
